

Living in the Desert

# Guest Accommodation

# On the Riverbanks Kuiseb Camp

Camping under the Milky Way on the banks of the ephemeral Kuiseb River – an excellent way to experience nature in the Namib Desert. Rent a tent or set up your own along this river oasis between dunes and gravel plains; listen to the calls of jackals, owls and barking

geckos as the sun goes down behind the majestic dunes of the Namib Sand Sea. The Kuiseb camp offers a shared kitchen, braai facilities, and a wind-protected dining area for 30 persons. Camp site enclosures provide privacy and protection and are conveniently close to ablution facilities.

- ✓ Rentable tents and bedding
- ✓ Picnic tables and braai facilities (30 persons)
- ✓ Shared kitchen (cooking utensils on request)
- ✓ Ablution facilities (showers, toilets)

## Desert Comfort Villa

Villas are the highest class of accommodation at Gobabeb and offer premium comfort for up to six persons. Situated close to the Kuiseb River, you have a great view of the Namib's red sand dunes directly from your terrace. A dining room, a spacious living room as well as a large, fully equipped kitchen provide all you need for a pleasant stay in the desert. The villas feature three bedrooms with two single beds each.

*Zophosis amabilis*, “amabilis” (Latin) = lovable

- ✓ “Lovely” venue
- ✓ Accommodates 100
- ✓ Conference technology

# Guided Tours

## Station Tour

Visitors, guided by Gobabeb staff, can learn first-hand about the operations at a world-renowned desert research station. The tour encompasses the history of the station, significant science contributions from the past, while showcasing current research projects. The operations of an impressive array of monitoring instruments that record atmospheric science data for climate change studies are explained. Visitors view the station's environmentally sustainable infrastructure like the off-grid hybrid energy system, the water purification system and various green construction technologies. The tour also provides a peek inside the labs with many information displays. Don't miss out on this unique opportunity to find out what happens in this special desert place.

## Nature Walk

The Nature Walk focuses on the three fascinating and diverse ecosystems on the doorstep of the research station. Specifically, this guided walk provides the chance to view a diversity of desert-adapted organisms, be introduced to the ecological processes that sustain the ecosystems, and learn about the geological processes that form the Namib Sand Sea, recently declared a UNESCO World Heritage Site. Ongoing research at Gobabeb continues to reveal new facts that contribute to our understanding of the Namib. This tour not only gives a glimpse of the breath-taking beauty of the area, providing a myriad of exceptional photo opportunities, but will teach you something new – from the hub and heart of Namib Desert knowledge!

## Night Walk

This popular night-time activity gives visitors the opportunity to witness the magnificence of the Milky Way. You will be fascinated by facts regarding the Namib's elusive nocturnal creatures. You will get up close and personal with barking geckos, palmetto geckos, bats and scorpions. This walk starts in the riverine forest and ends in the inter-dunes, the gateway for viewing the heavens.
